1. Usage instruction

```
<-----SYSTEM USAGE----->
< Please type the number before each option for c- >
< onducting that operation. >
< >
< Please feel free to type \b in any input field >
< to GO BACK to the previous page, or type \l to >
< directly LOG OUT. >
< >
< However, using shortcut to log out will NOT ask >
< for confirmation, please be careful to use it. >
< >
< [Default customer] member@student.monash.edu >
< Monash1234 >
< >
< [ Default admin ] admin@merchant.monash.edu >
< 12345678 >
< >
< You can add other accounts in User.txt if you l- >
< ike before executing the process. >
< >
< Have fun. >
<----->
```

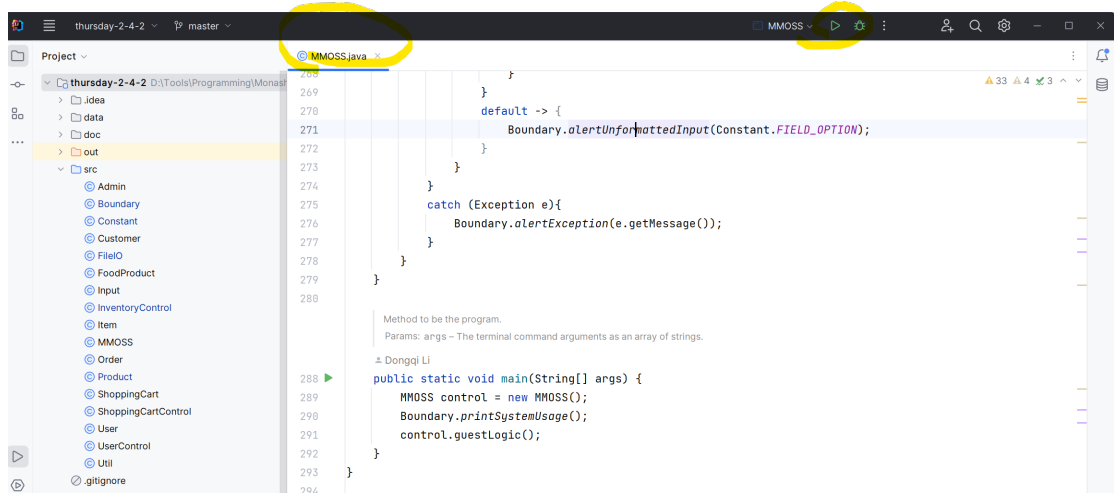

2.IDE configuration

The entry point of the system is defined in MMOSS.java.

For JDK version configuration, recommendation is above 17 (although versions above Java 8 should also be fine).

If you are using IntelliJ, please “open project” the extracted folder, double-click MMOSS.java which is in src/ folder, and click Run button from top bar, as the picture shows:

If you're using CLI, please make sure you've cut and paste the data/ folder into src/ folder, then in the terminal change directory to src/ folder, run "javac *.java" command to compile, then execute "java MMOSS".
